Phenomenology of Spirit and its Meaning in Logic

By Terry Pinkard

Introduction

By Slavoj Zizek

In fact I mean by this introduction – Being, pure Being.

Just the pronounciation matters.

I also mean all the problems of Spirit, all its crises – everything is Being, Pure Being as in fact Individual, only Individual which means in fact – that the Individual is concrete in Sirohi, he is in fact busy periodising, classifying, always winning in some real success which then is concrete success till he becomes a Master. He is in fact currently Master he means – something like absolute German Idealism is how he masters the daily problems of school children and women and such people who would be in sickness and illness otherwise.

I mean it is such things which even Tim Zizek is learning – what they call say anything about Sirohi – like say anything – which though has I add a certain Philosophy of Spirit.

Just read then this work with picture thinking and even film criticisms or as Cornel West argues musical scores – that then is what I call a short circuit.

My own juxtaposition is this work by Pinkard and a film on Bad healthcare and finally divine German Idealist teaching as Sirohi. Two parts then – this is called Spirit.

I. Beautiful Soul and Unhappy Consciousness – First Section which is Logic of a number of confused sense-perceptions becoming organised into a Logic of clearing that up which is in Houlgate a set of details in the particular logic of a Singular Individual

Just the process of clearing up the logic of a person, a normal person in fact which follows a drawing on a person as being, or pure being. In fact this then is pure Being, corresponding to Science of Logic – as Being.

II. Essence – a Contradiction which is then the Tarrying with the Negative and Spirit even Master-Slave dialectics in History –

what Sartre calls the master and slave till justified victory in French Revolution which is also a Question of Anxiety which is won by Spirit after a bad period of what in my life I call a distress or bad period of even the worst health

So contradiction becomes a rule. And is won.

III. Spiritual Labour and Music – how to read this with small details

Music then of labour and small details of labour – flowers.
